■ Monthly ■ 3-Month ■ 6-Month ■ Annual ■ 2-Year ■ 5-Year

| #  | Due Date   | Type                  | Key Parts / Components                                                                                                                                                                                                       | Scope                                                        |
|----|------------|-----------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------|
| 1  | 25.07.2026 | Monthly Inspection    | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update  |
| 2  | 25.08.2026 | Monthly Inspection    | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update  |
| 3  | 25.09.2026 | Monthly Inspection    | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update  |
| 4  | 25.09.2026 | 3-Month Service       | Drive motor mounting bolts — torque check • Gearbox oil level and condition • Hydraulic fluid level and contamination check • Bearing play on all rotating assemblies (+6 more)                                              | Drive system, hydraulics, structural fasteners torque audit  |
| 5  | 25.10.2026 | Monthly Inspection    | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update  |
| 6  | 25.11.2026 | Monthly Inspection    | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update  |
| 7  | 25.12.2026 | Monthly Inspection    | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update  |
| 8  | 25.12.2026 | 3-Month Service       | Drive motor mounting bolts — torque check • Gearbox oil level and condition • Hydraulic fluid level and contamination check • Bearing play on all rotating assemblies (+6 more)                                              | Drive system, hydraulics, structural fasteners torque audit  |
| 9  | 25.12.2026 | 6-Month Major Service | Full weld inspection — visual NDT • Paint and corrosion treatment on all steel surfaces • Gearbox oil change • Hydraulic fluid complete drain and refill (+6 more)                                                           | Weld inspection, NDT if required, oil change, load test      |
| 10 | 25.01.2027 | Monthly Inspection    | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update  |
| 11 | 25.02.2027 | Monthly Inspection    | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update  |
| 12 | 25.03.2027 | Monthly Inspection    | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update  |
| 13 | 25.03.2027 | 3-Month Service       | Drive motor mounting bolts — torque check • Gearbox oil level and condition • Hydraulic fluid level and contamination check • Bearing play on all rotating assemblies (+6 more)                                              | Drive system, hydraulics, structural fasteners torque audit  |
| 14 | 25.04.2027 | Monthly Inspection    | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update  |
| 15 | 25.05.2027 | Monthly Inspection    | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update  |
| 16 | 25.06.2027 | Monthly Inspection    | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update  |
| 17 | 25.06.2027 | 3-Month Service       | Drive motor mounting bolts — torque check • Gearbox oil level and condition • Hydraulic fluid level and contamination check • Bearing play on all rotating assemblies (+6 more)                                              | Drive system, hydraulics, structural fasteners torque audit  |
| 18 | 25.06.2027 | 6-Month Major Service | Full weld inspection — visual NDT • Paint and corrosion treatment on all steel surfaces • Gearbox oil change • Hydraulic fluid complete drain and refill (+6 more)                                                           | Weld inspection, NDT if required, oil change, load test      |
| 19 | 25.06.2027 | Annual Inspection     | Certified engineer full structural inspection • NDT (Magnetic Particle / Dye Penetrant) on high-stress welds • Complete documentation review and update • All safety certificates and conformity documents renewed (+6 more) | Certified engineer inspection, NDT welds, full documentation |
| 20 | 25.07.2027 | Monthly Inspection    | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update  |
| 21 | 25.08.2027 | Monthly Inspection    | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update  |
| 22 | 25.09.2027 | Monthly Inspection    | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update  |
| 23 | 25.09.2027 | 3-Month Service       | Drive motor mounting bolts — torque check • Gearbox oil level and condition • Hydraulic fluid level and contamination check • Bearing play on all rotating assemblies (+6 more)                                              | Drive system, hydraulics, structural fasteners torque audit  |
| 24 | 25.10.2027 | Monthly Inspection    | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update  |

| 26 | 25.12.2027 | Monthly Inspection    | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update       |
| 27 | 25.12.2027 | 3-Month Service       | Drive motor mounting bolts — torque check • Gearbox oil level and condition • Hydraulic fluid level and contamination check • Bearing play on all rotating assemblies (+6 more)                                              | Drive system, hydraulics, structural fasteners torque audit       |
| 28 | 25.12.2027 | 6-Month Major Service | Full weld inspection — visual NDT • Paint and corrosion treatment on all steel surfaces • Gearbox oil change • Hydraulic fluid complete drain and refill (+6 more)                                                           | Weld inspection, NDT if required, oil change, load test           |
| 29 | 25.01.2028 | Monthly Inspection    | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update       |
| 30 | 25.02.2028 | Monthly Inspection    | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update       |
| 31 | 25.03.2028 | Monthly Inspection    | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update       |
| 32 | 25.03.2028 | 3-Month Service       | Drive motor mounting bolts — torque check • Gearbox oil level and condition • Hydraulic fluid level and contamination check • Bearing play on all rotating assemblies (+6 more)                                              | Drive system, hydraulics, structural fasteners torque audit       |
| 33 | 25.04.2028 | Monthly Inspection    | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update       |
| 34 | 25.05.2028 | Monthly Inspection    | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update       |
| 35 | 25.06.2028 | Monthly Inspection    | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update       |
| 36 | 25.06.2028 | 3-Month Service       | Drive motor mounting bolts — torque check • Gearbox oil level and condition • Hydraulic fluid level and contamination check • Bearing play on all rotating assemblies (+6 more)                                              | Drive system, hydraulics, structural fasteners torque audit       |
| 37 | 25.06.2028 | 6-Month Major Service | Full weld inspection — visual NDT • Paint and corrosion treatment on all steel surfaces • Gearbox oil change • Hydraulic fluid complete drain and refill (+6 more)                                                           | Weld inspection, NDT if required, oil change, load test           |
| 38 | 25.06.2028 | Annual Inspection     | Certified engineer full structural inspection • NDT (Magnetic Particle / Dye Penetrant) on high-stress welds • Complete documentation review and update • All safety certificates and conformity documents renewed (+6 more) | Certified engineer inspection, NDT welds, full documentation      |
| 39 | 25.06.2028 | 2-Year Full Overhaul  | Complete disassembly of drive unit and gearbox • Bearing replacement (drive shaft, cabin pivot, main arm) • Drive chain / belt complete replacement • Hydraulic seals and O-rings replacement (+6 more)                      | Full overhaul, replace all wear parts, load test, recertification |
| 40 | 25.07.2028 | Monthly Inspection    | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update       |
| 41 | 25.08.2028 | Monthly Inspection    | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update       |
| 42 | 25.09.2028 | Monthly Inspection    | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update       |
| 43 | 25.09.2028 | 3-Month Service       | Drive motor mounting bolts — torque check • Gearbox oil level and condition • Hydraulic fluid level and contamination check • Bearing play on all rotating assemblies (+6 more)                                              | Drive system, hydraulics, structural fasteners torque audit       |
| 44 | 25.10.2028 | Monthly Inspection    | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update       |
| 45 | 25.11.2028 | Monthly Inspection    | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update       |
| 46 | 25.12.2028 | Monthly Inspection    | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update       |
| 47 | 25.12.2028 | 3-Month Service       | Drive motor mounting bolts — torque check • Gearbox oil level and condition • Hydraulic fluid level and contamination check • Bearing play on all rotating assemblies (+6 more)                                              | Drive system, hydraulics, structural fasteners torque audit       |
| 48 | 25.12.2028 | 6-Month Major Service | Full weld inspection — visual NDT • Paint and corrosion treatment on all steel surfaces • Gearbox oil change • Hydraulic fluid complete drain and refill (+6 more)                                                           | Weld inspection, NDT if required, oil change, load test           |
| 49 | 25.01.2029 | Monthly Inspection    | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update       |

| 50 | 25.02.2029 | Monthly Inspection    | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update  |
| 51 | 25.03.2029 | Monthly Inspection    | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update  |
| 52 | 25.03.2029 | 3-Month Service       | Drive motor mounting bolts — torque check • Gearbox oil level and condition • Hydraulic fluid level and contamination check • Bearing play on all rotating assemblies (+6 more)                                              | Drive system, hydraulics, structural fasteners torque audit  |
| 53 | 25.04.2029 | Monthly Inspection    | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update  |
| 54 | 25.05.2029 | Monthly Inspection    | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update  |
| 55 | 25.06.2029 | Monthly Inspection    | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update  |
| 56 | 25.06.2029 | 3-Month Service       | Drive motor mounting bolts — torque check • Gearbox oil level and condition • Hydraulic fluid level and contamination check • Bearing play on all rotating assemblies (+6 more)                                              | Drive system, hydraulics, structural fasteners torque audit  |
| 57 | 25.06.2029 | 6-Month Major Service | Full weld inspection — visual NDT • Paint and corrosion treatment on all steel surfaces • Gearbox oil change • Hydraulic fluid complete drain and refill (+6 more)                                                           | Weld inspection, NDT if required, oil change, load test      |
| 58 | 25.06.2029 | Annual Inspection     | Certified engineer full structural inspection • NDT (Magnetic Particle / Dye Penetrant) on high-stress welds • Complete documentation review and update • All safety certificates and conformity documents renewed (+6 more) | Certified engineer inspection, NDT welds, full documentation |
| 59 | 25.07.2029 | Monthly Inspection    | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update  |
| 60 | 25.08.2029 | Monthly Inspection    | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update  |
| 61 | 25.09.2029 | Monthly Inspection    | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update  |
| 62 | 25.09.2029 | 3-Month Service       | Drive motor mounting bolts — torque check • Gearbox oil level and condition • Hydraulic fluid level and contamination check • Bearing play on all rotating assemblies (+6 more)                                              | Drive system, hydraulics, structural fasteners torque audit  |
| 63 | 25.10.2029 | Monthly Inspection    | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update  |
| 64 | 25.11.2029 | Monthly Inspection    | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update  |
| 65 | 25.12.2029 | Monthly Inspection    | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update  |
| 66 | 25.12.2029 | 3-Month Service       | Drive motor mounting bolts — torque check • Gearbox oil level and condition • Hydraulic fluid level and contamination check • Bearing play on all rotating assemblies (+6 more)                                              | Drive system, hydraulics, structural fasteners torque audit  |
| 67 | 25.12.2029 | 6-Month Major Service | Full weld inspection — visual NDT • Paint and corrosion treatment on all steel surfaces • Gearbox oil change • Hydraulic fluid complete drain and refill (+6 more)                                                           | Weld inspection, NDT if required, oil change, load test      |
| 68 | 25.01.2030 | Monthly Inspection    | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update  |
| 69 | 25.02.2030 | Monthly Inspection    | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update  |
| 70 | 25.03.2030 | Monthly Inspection    | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update  |
| 71 | 25.03.2030 | 3-Month Service       | Drive motor mounting bolts — torque check • Gearbox oil level and condition • Hydraulic fluid level and contamination check • Bearing play on all rotating assemblies (+6 more)                                              | Drive system, hydraulics, structural fasteners torque audit  |
| 72 | 25.04.2030 | Monthly Inspection    | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update  |
| 73 | 25.05.2030 | Monthly Inspection    | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update  |
| 74 | 25.06.2030 | Monthly Inspection    | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update  |

|----|------------|------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------|
| 75 | 25.06.2030 | 3-Month Service              | Drive motor mounting bolts — torque check • Gearbox oil level and condition • Hydraulic fluid level and contamination check • Bearing play on all rotating assemblies (+6 more)                                              | Drive system, hydraulics, structural fasteners torque audit        |
| 76 | 25.06.2030 | 6-Month Major Service        | Full weld inspection — visual NDT • Paint and corrosion treatment on all steel surfaces • Gearbox oil change • Hydraulic fluid complete drain and refill (+6 more)                                                           | Weld inspection, NDT if required, oil change, load test            |
| 77 | 25.06.2030 | Annual Inspection            | Certified engineer full structural inspection • NDT (Magnetic Particle / Dye Penetrant) on high-stress welds • Complete documentation review and update • All safety certificates and conformity documents renewed (+6 more) | Certified engineer inspection, NDT welds, full documentation       |
| 78 | 25.06.2030 | 2-Year Full Overhaul         | Complete disassembly of drive unit and gearbox • Bearing replacement (drive shaft, cabin pivot, main arm) • Drive chain / belt complete replacement • Hydraulic seals and O-rings replacement (+6 more)                      | Full overhaul, replace all wear parts, load test, recertification  |
| 79 | 25.07.2030 | Monthly Inspection           | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update        |
| 80 | 25.08.2030 | Monthly Inspection           | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update        |
| 81 | 25.09.2030 | Monthly Inspection           | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update        |
| 82 | 25.09.2030 | 3-Month Service              | Drive motor mounting bolts — torque check • Gearbox oil level and condition • Hydraulic fluid level and contamination check • Bearing play on all rotating assemblies (+6 more)                                              | Drive system, hydraulics, structural fasteners torque audit        |
| 83 | 25.10.2030 | Monthly Inspection           | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update        |
| 84 | 25.11.2030 | Monthly Inspection           | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update        |
| 85 | 25.12.2030 | Monthly Inspection           | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update        |
| 86 | 25.12.2030 | 3-Month Service              | Drive motor mounting bolts — torque check • Gearbox oil level and condition • Hydraulic fluid level and contamination check • Bearing play on all rotating assemblies (+6 more)                                              | Drive system, hydraulics, structural fasteners torque audit        |
| 87 | 25.12.2030 | 6-Month Major Service        | Full weld inspection — visual NDT • Paint and corrosion treatment on all steel surfaces • Gearbox oil change • Hydraulic fluid complete drain and refill (+6 more)                                                           | Weld inspection, NDT if required, oil change, load test            |
| 88 | 25.01.2031 | Monthly Inspection           | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update        |
| 89 | 25.02.2031 | Monthly Inspection           | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update        |
| 90 | 25.03.2031 | Monthly Inspection           | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update        |
| 91 | 25.03.2031 | 3-Month Service              | Drive motor mounting bolts — torque check • Gearbox oil level and condition • Hydraulic fluid level and contamination check • Bearing play on all rotating assemblies (+6 more)                                              | Drive system, hydraulics, structural fasteners torque audit        |
| 92 | 25.04.2031 | Monthly Inspection           | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update        |
| 93 | 25.05.2031 | Monthly Inspection           | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update        |
| 94 | 25.06.2031 | Monthly Inspection           | Safety restraints (lap bars, seat belts, harnesses) • Emergency stop buttons — functional test • Drive chain / belt tension and wear • All visible welds and structural connections (+6 more)                                | Full mechanical inspection, brake test, operator log update        |
| 95 | 25.06.2031 | 3-Month Service              | Drive motor mounting bolts — torque check • Gearbox oil level and condition • Hydraulic fluid level and contamination check • Bearing play on all rotating assemblies (+6 more)                                              | Drive system, hydraulics, structural fasteners torque audit        |
| 96 | 25.06.2031 | 6-Month Major Service        | Full weld inspection — visual NDT • Paint and corrosion treatment on all steel surfaces • Gearbox oil change • Hydraulic fluid complete drain and refill (+6 more)                                                           | Weld inspection, NDT if required, oil change, load test            |
| 97 | 25.06.2031 | Annual Inspection            | Certified engineer full structural inspection • NDT (Magnetic Particle / Dye Penetrant) on high-stress welds • Complete documentation review and update • All safety certificates and conformity documents renewed (+6 more) | Certified engineer inspection, NDT welds, full documentation       |
| 98 | 25.06.2031 | 5-Year Structural Assessment | Independent third-party structural integrity assessment • Full fatigue analysis on main rotating structure • Ultrasonic thickness measurement of main frame tubes • All primary welds — UT or X-ray inspection (+6 more)     | Structural integrity assessment, fatigue analysis, recertification |

## COMPONENT NDT & ROUTINE MAINTENANCE INSPECTION RECORD

Ride: Ferris Wheel 26M Park Model | Serial No: GLP-FW-AE-2026-010 | Issue Date: 01.06.2026

INSTRUCTIONS: Tick (☐) the appropriate frequency box upon completion. Record inspector's signature in the Signature column. This record must be retained for a minimum of 5 years. NDT inspections must be performed by a qualified Level II or above technician.

| No. | Component Name                                | Category | Inspection Task / Method | Frequency | Daily ☐ | Weekly ☐ | Monthly ☐ | Annual ☐ | Inspector Signature |

Table 7. Daily Pre-Opening Inspection Checklist

### 10.3. Daily Pre-Opening Inspection Tasks

| Task                                           | Detail of Inspection                                                                                                          | Status<br>(Pass/Fail) | Operator Initials |
|------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------|-----------------------|-------------------|
| <b>1. Walk-Around Visual Inspection</b>        | Inspect the ride structure, towers, supports, and foundations for any visible damage, cracks, corrosion, or loose fasteners.  | [   ]                 |                   |
|                                                | Check all safety fences, gates, and barriers to ensure they are properly installed and secure.                                | [   ]                 |                   |
|                                                | Inspect all gondolas (cabins) for any damage to the frame, doors, windows, or seats.                                          | [   ]                 |                   |
|                                                | Verify all lighting, signage, and warning decals are intact and legible.                                                      | [   ]                 |                   |
| <b>2. Mechanical Systems Check</b>             | Check the main drive motor, gearboxes, and tires for any unusual noise, excessive heat, or leaks.                             | [   ]                 |                   |
|                                                | Inspect the main axle, wheel hub, and all wheel bearings for proper lubrication and any signs of wear.                        | [   ]                 |                   |
|                                                | Examine the braking system, including brake pads and calipers, for proper function and wear.                                  | [   ]                 |                   |
|                                                | Check the tension and condition of all support cables, spokes, and structural ropes.                                          | [   ]                 |                   |
| <b>3. Electrical and Control Systems Check</b> | Test all emergency stop buttons and safety interlock systems for proper function.                                             | [   ]                 |                   |
|                                                | Inspect the main control panel for any warning lights, error codes, or signs of damage.                                       | [   ]                 |                   |
|                                                | Verify the functionality of all operator controls, including start, stop, and speed adjustments.                              | [   ]                 |                   |
|                                                | Test all communication systems, such as microphones and two-way radios.                                                       | [   ]                 |                   |
| <b>4. Operational Test</b>                     | Conduct a full, unloaded operational cycle of the ride.                                                                       | [   ]                 |                   |
|                                                | During the test cycle, listen for any unusual noises (e.g., grinding, clunking) and observe for jerky or irregular movements. | [   ]                 |                   |
|                                                | Verify that all door locks on the gondolas are securely latched throughout the cycle.                                         | [   ]                 |                   |
|                                                | Check wind speed monitoring equipment for accurate readings and ensure the ride is within its specified operating parameters. | [   ]                 |                   |
| <b>5. Documentation &amp; Record Keeping</b>   | Review the maintenance log and verify all required daily, weekly, and monthly maintenance tasks are up to date.               | [   ]                 |                   |
|                                                | Confirm the Certificate of Inspection is current and posted as required.                                                      | [   ]                 |                   |
|                                                | Document all findings, including any identified deficiencies, in the daily inspection log.                                    | [   ]                 |                   |

Table 8. Daily Pre-Opening Inspection Tasks Checklist

| Frequency                        | Component/Area              | Task/Procedure                                                                                                       |
|----------------------------------|-----------------------------|----------------------------------------------------------------------------------------------------------------------|
| <b>Daily</b>                     | Ride Levelling & Supports   | Check for correct ride levelling and condition of ground supports.                                                   |
|                                  | Structure & Fasteners       | Visually inspect structure, fasteners, bolts, and pins for defects, security, and general condition.                 |
|                                  | Loading Platform & Barriers | Check the condition and security of the loading platform, perimeter fencing, and barriers.                           |
|                                  | Gondolas Door Lock          | Check gondolas door locks and all associated attachments and fasteners.                                              |
|                                  | Operator Controls           | Check for the correct operation of ride and operator controls, including the emergency switch.                       |
|                                  | Signage & Warnings          | Check that correct signage and warnings are displayed, are legible, and are prominently positioned.                  |
|                                  | Jacks & Packing             | Check the jacks and packing.                                                                                         |
|                                  | Emergency Stop              | Check the emergency stop function.                                                                                   |
|                                  | Pins & Safety Pins          | Check that all pins have their safety split pins.                                                                    |
| <b>Weekly</b>                    | Welds & Stress Areas        | Visually inspect welds and stress areas for eventual fissures.                                                       |
|                                  | Ball Bearing                | Lubricate the outside soothing and the sliding balls with grease.                                                    |
|                                  | Decorative Panels & Guards  | Check the condition and security of all decorative panels, objects, guards, lighting, and associated fasteners.      |
|                                  | Electrical System           | Check the operation and general condition of the electrical system.                                                  |
|                                  | Maintenance & Lubrication   | Complete scheduled maintenance and lubrication.                                                                      |
|                                  | Tire Pressure               | Check tire pressure.                                                                                                 |
|                                  | Bolt Torque Settings        | Check torque settings for all bolts.                                                                                 |
| <b>Monthly/<br/>As Needed</b>    | Gear Boxes                  | Check the oil level in the gear boxes every 50 hours of operation.                                                   |
|                                  | Motor Gear Boxes            | Check the correct tightening of screws after the first 50 hours of operation and every 200 hours thereafter.         |
|                                  | All Screws                  | Check the correct closure of all screws after the first 100 hours of operation.                                      |
|                                  | Motor AC                    | Disassemble the air filter and clean it every 200 hours of operation.                                                |
|                                  | All Welds                   | Visually check for eventual fissures every 200 hours of operation.                                                   |
| <b>Annually/<br/>Bi-Annually</b> | NDT Tests (VT)              | Perform Visual Testing (VT) once after 1500 hours of operation.                                                      |
|                                  | NDT Tests (PT)              | Perform Liquid Penetrant Testing (PT) once after 3000 hours of operation.                                            |
|                                  | Torque Wrenches             | Calibrate torque wrenches annually.                                                                                  |
|                                  | Fastener Torque             | Perform a full check of torque on gondola-to-arm and main slew bearing to frame connections.                         |
|                                  | Plug-In Rail                | Tighten the plug-in rail in the summer and loosen it in the winter to account for thermal expansion and contraction. |

Table 9. Maintenance Tasks

## 17. Inspection

| INSPECTIONS SCHEDULE |                                   |                                                                                                                                                                   |                                              |
|----------------------|-----------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------|
| FERRIS WHEEL         |                                   |                                                                                                                                                                   |                                              |
| ID                   | Details                           | Type of control                                                                                                                                                   | Check Frequency                              |
| 01                   | Fixing Screws Small Arm – Gondola | Daily check the correct tightening of the screws and pins                                                                                                         | Daily                                        |
| 02                   | Transmission Wheel of the Drive   | Position the arm exactly on the motors axle and make sure that the pressure at the wheels is set to 80-100 psi (5.5-6.9 bar)                                      |                                              |
| 03                   | Entrance / Exit door              | Daily check the closure component wear                                                                                                                            |                                              |
| 04                   | Ball Bearing Center slew ring     | Lubrication with grease on the outside soothing and on the sliding balls (the lubrication is advisable with ball bearing with slow rotation).<br>PAY ATTENTION!!! | Weekly                                       |
| 05                   |                                   | Check the correct closure of the screws.                                                                                                                          | After the first 100 hours<br>Every 800 hours |
| 06                   | Check the bolts supporting arms   | Daily check that all bolts between the arms and the hub flanges are well tightened and that have the split pins.                                                  | Daily                                        |
| 07                   | Pins and safety split pins check  | Check that all pins (supplied by the manufacturer) have the safety split pins.                                                                                    |                                              |
| 08                   | All the welds                     | Check visually eventual fissures.                                                                                                                                 | Every 200 Hours                              |
| 09                   | Gear Boxes                        | Check the oil level in the gear boxes. Check the evenness                                                                                                         | Every 50 Hours                               |
| 10                   | Motor AC                          | Disassemble the air filter and clean it.                                                                                                                          | Every 200 Hours                              |
| 11                   | Motor Gear Boxes                  | Check of the correct screws tightening.                                                                                                                           | After the first 50 Hours<br>Every 200 Hours  |
| 12                   | All the screws                    | Check of the correct closure of all screws, making the flanges.                                                                                                   | After the First 100 Hours                    |
| 13                   | Winches                           | Wire quality control is essential before using winches                                                                                                            | Before every use                             |
| 14                   |                                   | Checking hooks, fasteners and fittings for winches must be done before using the winch.                                                                           |                                              |
| 15                   |                                   | Controlling the level and quality of gear oil and lubrication of wires                                                                                            |                                              |

Table 13. Inspection Schedule

## Daily Checklist

This to be completed before the ride is opened to public.

**Name of ride:**

**Ride Number:**

**When completing below please use following code do not use ticks.**

**P** = Pass      **S** = Satisfactory      **S/M** = Satisfactory but Monitor

**F** = Fail (note all failures to be notified to Competent Person)

**Time of inspection** \_\_\_\_\_ **Date of Inspection** \_\_\_\_\_

| Item No | Description of Check Required                                                                                                                | Comments | Result |
|---------|----------------------------------------------------------------------------------------------------------------------------------------------|----------|--------|
| 1       | Check for correct ride levelling and condition of ground supports.                                                                           |          |        |
| 2       | Visually inspect structure and fasteners (Bolts, pins, and safety pins (Split pins & “R” clips) for defects, general condition and security. |          |        |
| 3       | Check loading platform, perimeter fencing and barriers – condition and security.                                                             |          |        |
| 4       | Check gondolas door locks and all associated attachments, and fasteners –                                                                    |          |        |
| 5       | Correct operation of ride and operators’ controls (Check emergency switch).                                                                  |          |        |
| 6       | Check correct signage/warnings are displayed – legible and prominently positioned.                                                           |          |        |
| 7       | Jacks, the packing                                                                                                                           |          |        |
| 8       | Emergency Stop                                                                                                                               |          |        |
